Jerry FREDERIC

Frontend Web Developer

Puteaux (92), France · +33 6 82 29 65 59 · jerry.fpl@outlook.com · LinkedIn · GitHub · Portfolio

PROFILE

Professional frontend developer since 2020, I discovered development in 2017 by building HTML/CSS landing pages during my Digital Marketing Consultant engagement. Specialized in JavaScript and TypeScript, with modern frameworks such as React.js and Next.js, I build intuitive, responsive, and high-performing interfaces tailored to each project's needs. With experience in SaaS solutions and e-commerce, I deliver quality solutions in agile environments, with a collaborative mindset.

PROFESSIONAL EXPERIENCE

Frontend Developer June 2025 – Present

Everest Digital – Web and AI development – Neuilly-sur-Seine

→ Development of websites and applications with React.js, Next.js, and Node.js, deployed on Vercel; CI/CD with GitHub Actions and GitHub workflow (issues, labels, templates, pull requests)
→ Technical leadership of a team of collaborators and interns
→ Infrastructure: Oracle Cloud VPS, Zoho Mail (dedicated domain, collaborator accounts), Slack, credential management with Bitwarden (2FA), GDPR-compliant approach
→ Self-hosted n8n automation (dedicated agency address): client-feedback email → GitHub issue → Slack notification
→ Creation of custom Claude Code skills connected to the Exa API (web search for AI agents)
→ HubSpot CRM for prospecting (setup in progress)

Frontend Developer June 2022 – March 2025

Wshop – E-commerce SaaS platform – Paris

→ **BUILD**: front-end development, monitoring, and maintenance of e-commerce sites in Desktop, Mobile, POS (point-of-sale system), and Kiosk formats via the WSHOP unified digital commerce SaaS, across 50+ e-commerce sites; design, development, and integration of new features on the SaaS and deployment on client sites
→ Front-end development on the shared back-office (SaaS), based on a Bootstrap template (Twig macros): responsive integration from scratch of partner sites (Notshycachemire.com, Jonak.fr, Suncoo-paris.fr, Zapa, Vanessa Bruno, Atmosphera), performance optimizations, fixes, and functional enhancements
→ Integration and configuration of the promo code system and Mondial Relay on the shared back-office; integration of payment methods Alma, Klarna, PayPal, Apple Pay
→ Design and development of a multi-destination delivery service (several addresses, a single cart)
→ Redesign of tools (technical debt); technical documentation and pre-production tests to ensure release quality and reliability
→ Daily collaboration with Product, QA, Design, Marketing (SEO), and Client teams; brainstorms and project kick-offs
→ **RUN**: continuous delivery via CI/CD, front-end library migration, performance optimization (lazy loading, bundle size reduction, load times); code reviews, best practices, and onboarding of new team members
→ **TMA / Support**: client tickets and fixes on the SaaS and partner sites (display, functionality, JS errors), debugging, corrective maintenance; urgent hotfixes for service continuity; documentation of legacy code anomalies
→ **Agentic development**: Copilot, Claude Code, and Cursor

Technologies/Tools: JavaScript, Vue 2, Twig, Bootstrap, HTML5, CSS3, Sass/SCSS, PHP, Figma, Git, GitLab, CI/CD, Jira

Frontend Developer June 2021 – February 2022

JFPL.FR – Poitiers

→ Mockup and creation of the jfpl.fr website, responsive design integration with HTML, Sass, JavaScript (ES6), jQuery
→ Versioning with Git, dependency management with NPM, production release after Webpack bundling, hosted on Netlify

Frontend Developer February 2020 – April 2020

NKH – E-commerce – Paris

→ Mockup and full development of a responsive, cross-device e-commerce platform: product management, order system, legal notices, newsletter, FAQ
→ Collaboration with business teams to translate business requirements into technical features

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Sass/SCSS, GraphQL, PHP

Frameworks & Libraries: React.js, Next.js, jQuery, Node.js, Express.js, Bootstrap, Rolly, AOS, Gulp, Webpack

Testing: Jest, React Testing Library

Version Control & Collaboration: Git, GitLab, SourceTree, Jira, ClickUp, BrowserStack

Platforms & CMS: WordPress, Shopify, WooCommerce, Netlify, Heroku, Firebase, AMPPS, Apache

Design & UI/UX: Figma, Adobe XD, Photoshop, Illustrator, Sketch, Balsamiq

Infrastructure & Automation: Oracle Cloud (VPS), n8n, GitHub Actions (CI/CD), Bitwarden, Zoho Mail, Slack API, HubSpot, Vercel, Claude Code, Exa API

PERSONAL PROJECTS

Speechbot

Next.js 15, TypeScript, Tailwind CSS, Web Speech API

→ Text-to-speech web application using the Web Speech API: language selection, automatic voice detection, voice choice, and adjustable playback speed
→ Architecture based on reusable components with the Next.js App Router (Button, Dropdown, SpeedSelector, TextArea)
→ Responsive interface (mobile, tablet, desktop) with a dark theme and a loading state during voice initialization

WeTranslate

Next.js 16, React 19, TypeScript, Tailwind CSS 4, pnpm

→ Real-time translation web application with automatic source-language detection and quick language swap
→ Text-to-speech playback of translations (Web Speech API) and one-click copy to clipboard
→ Next.js API routes (translation, language detection, available languages) and custom components, including a custom language dropdown; responsive design

Personal Portfolio

JavaScript, HTML, Sass, Bootstrap, Rolly.js, Webpack

→ HTML/Sass integration with a custom Webpack workflow, optimized for performance and cross-browser compatibility
→ Mobile-first approach with smooth animations and fluid interactions
